8 July 1964

MEMORANDUM FOR: Director of Logistics

SUBJECT: Establishment of Task Order  
with [REDACTED]

25X1A5a1

REFERENCE: Technical Proposal [REDACTED]

25X1A5a1

25X1A5a1

1. Under the terms of Contract H2103, Task Order 6, [REDACTED] designed, fabricated, and installed an antenna system consisting of five bands. This system was delivered in 1958, and has been a vital part of the [REDACTED] Project. As a result of a recent accident at [REDACTED], band 4 was destroyed, and the Chief of Station requested that all equipment be replaced with exact items to insure system compatibility. He further requested that band 5 be upgraded to include an elevation capability, and that this equipment be shipped by priority air transportation. This upgrading of band 5 will serve as an assist to [REDACTED] for signal acquisition and is urgently needed.

2. These requirements were discussed with [REDACTED] a representative of [REDACTED], who engineered the original project, and a result of this discussion, [REDACTED] submitted a proposal which describes a system modification that fulfills our immediate requirements. My engineering staff has carefully considered their proposal and have found it reasonable. Sole source procurement is justifiable in this case to insure systems compatibility and expeditious handling of this procurement request.
